

EXERCISE 1

Abstract base class that defines the common properties of all the items that can be borrowed at a library.

Each class also provides accessor methods to retrieve the values of its properties.

This is another abstract base class that represents a media item, such as a CD, DVD or Blu-ray disc. It derives from "Items" and adds a vector of tracks.

This class derives from "Items" and adds the specific properties of a book.

These classes derives from "MultimediaItems" and adds the specific properties of a CD, DVD and Blu-Ray disc.
